

FIELD DAY 2020 June 27 - 28

Jordan from the Fairview Heights Parks Department just returned my call.

He said they have canceled all June reservations up to ours. (for June 27-28)

The managers will make a decision closer to our date as to whether the pavilion will be opened or not. He didn't know the date of that decision.

Michael suggested a planning session out at the park. My calendar is very open so if someone else could pick a time(s) we'll go with the slot that the most of us can attend. I would only suggest early evening like 6 pm.

I would like everyone to think about the idea of having a dedicated antenna for each band and have the antennas spread out. I know this would require tents or campers for the stations. Putting individual stations any distance from the pavilion would be best for social distancing and perhaps reduce RFI.

We probably need some decision date ourselves that we could use to determine park / Rich / or home stations. I'll suggest June 19th. Rich - do you need more lead time to get ready for us?

Last night the club approved \$100 for expenses.

Dean, I wonder too how they will combine the class "D" station scores. Seems there could be a big gun class "D" that would be blowing everyone away and then added to some lowly class "A" for a supper good score! Maybe power limits on the class Ds? We'll see what comes up.
